Art Unit: Not Yet Assigned

A2 4. (Amended) A method according to claim 1 in which the gain characteristic to be applied to an input signal is determined in response to a manual input.

A3 5. (Amended) A method according to claim 4 in which an interpolation between two or more impulse responses is made and applied to the input signal.

A4 7. (Amended) A method according to claim 1 in which the gain characteristic corresponds to a gain characteristic of an audio signal processor.

10. (Amended) Apparatus according to claim 8 including means for storing at least one impulse response, and means for applying a stored impulse response to the input signal in addition to the gain characteristic.

11. (Amended) Apparatus according to claim 9 including a manual input for a gain characteristic to be applied to an input signal.

12. (Amended) Apparatus according to claim 11 including means for interpolating between two or more impulse responses before applying the interpolated response to the input signal.

A5 14. (Amended) Apparatus according to claim 8 in which the gain characteristic corresponds to a gain characteristic of an audio signal processor.
